Roblox works best over Wi-Fi. Jul 22, 2021 Version 2.487.426768 To make Roblox work better for you, we deliver updates regularly. These updates include bug fixes and improvements for speed and reliability. This isn't a full criticism, due to the fact that I don't play every single game that's popular I Roblox. I have been playing since 2014, and like every young kid back then, got my account hacked. I contacted Roblox and they didn't do anything about it, but that's not really an issue because it was my fault for having it hacked. There used to be way too many games to count that would trick kids into giving away their password and other details, and luckily Roblox has been working on fixing that. One of the biggest issues I have though is about the report system, they don't do anything. This game's demographic is young teens, so it's only natural for them to be rude. But the thing is, you can't report people and actually have things happen. Another thing is, the sex games. Like I've said before, this game is for teens, so we're bound to find these games once in a while. But I believe there should be more going on to stop this, for example, the chat filter being removed. There should be an option to remove the filter, and then have the game checked before it can get published. Besides that, a lot has changed like egg hunts being abandoned, rthro being pushed in (even though most people do not care for it) and more concerts happening. If you have a child, be a real parent and monitor what they're doing/ watching, just cause it's a children's game doesn't give you the right to put the blame on everyone else. I think roblox is just amazing!! The programming is so good, and I honestly play it about every day!! But just like other apps, it does have some problems. First, the reports that you put in DON'T WORK. Whenever I report something, it says they will try to fix it but nothing happens! Also, some of the games are laggy and are made for computers. I do SOMETIMES play Roblox on a computer, but other times I don't so for games that are made for computers, I can't play and it makes me sad. Another thing is some of the games are inappropriate for kids! Some games have INFLATION or SEX in them! That is WAY too inappropriate for kids! Also, I sometimes see people finding ways to MAKE IT LOOK LIKE THEIR TRYING TO MAKE BABIES BECAUSE THEY CANT DO OR SAY STUFF ABOUT THAT. Now also another problem is that all the things that you say like your age... It gets hashtags! I mean- people CAN say their age, but they just shouldn't say their address or phone number. They can say their age without people finding out where they live. Also, I think Roblox CAN be for kids and not just for 12+. Why? Well it's because at least if a kid is being watched by their parents/guardian, roblox actually could be for kids! If changes could be made, I would absolutely love that! Thank you and I hope you understand! Also, sometimes I have problems playing the games on Roblox because it always says that my internet is not on, but I have internet! I love this game it is amazing but I also have some things that you could fix and some suggestions as well. 1. The reporting system, I love the idea that you can report people if they have done something rude to you but you never really know if Roblox actually reads your report because you never get any notifications so please add something that will alert you when your report has been read whether it's that day or 9 months later. 2. The number of friends I like the idea that you can friend people so that you can stay in touch with them but there is a certain limit (200) so it is not very fun when someone wants to friend you and you want to as well but you are at the friend limit. Can you please at least possibly make it 300 maybe 250? 3. I have a suggestion where if there is a person who has been reported on more than 5 different games more than 3 times they should get banned for a month to teach them that it's not ok to do that but also not ban them forever if they get reported in 5 different games more than 3 times 3 times then you ban them permanently from all the games they were reported in. 4. I think that you should not let any people that have gotten their account deleted create more than 5 more accounts because they may keep doing the same thing they did before and if they create another account keep a monitor on them so that they can be watched just in case they do that same thing again and so that they can still play. I'm sorry that this report was so long @ The developer, Roblox Corporation, indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The following data may be collected and linked to your identity: Purchases Location Contact Info User Content Search History Identifiers Usage Data Diagnostics Privacy practices may vary, for example, based on the features you use or your age. Learn More Developer Website App Support Privacy Policy Roblox is a well-known platform for game connoisseurs, whether you enjoy playing them or making them you'll find it all here. And now you can play various games on your Android device.Play your favorite Roblox games on the go with the Roblox Android application. Customize your character and venture on new worlds. One app to rule them all, one application to play all your favorite games on. Roblox is a unique platform where users such as yourself can create their own worlds and allow the public or only their friends to test it out. However, the creation of these worlds and rooms is only available on the desktop application called Roblox Studio. Being a version ported to mobile, you won't be able to play requirement heavy games and loading into many other worlds will take a few moments. While you can't tinker and adjust the coding of your world, you're still fully capable of entering it and many others with the Roblox Android application. Run, jump and dash out of the way of obstacles in one of the many obbys available, or become a lord of enterprise as you battle fellow players in a colorful tycoon game. There are many activities available for you to compete in, such as hide and seek, various adventure RPGs, and multiple shooters. Visit the Robux store, spend some money and unleash your inner fashionista as you dress up your avatar to perfection. Once you're fashionable and ready, you can meet up with friends in a social world or challenge them to a few games. Where can you run this program? Roblox is available for all Android and IOS devices and has similar programs for desktops.Is there a better alternative?No, there is no other platform that lets you create and enjoy those creations as easily as Roblox does. The only way to enjoy the experience more is to play it on a computer.Roblox is a fun and engaging way to spend your afternoon. You'll join other players' creations and customize your own avatar. Should you download it? Yes, this is a great application if you're looking to enjoy a wider range of mobile games.HighsPlay on the goLarge selection of gamesDress up your avatarLowsSlow loading timeCan't run many gamesLimited features Description: The roblox creator OS: Android , Windows Phone Want to cheat on your video games? Roblox Studio gives great effects. Is Roblox Studio Free? Roblox Studio is free to use. Therefore, you are able to use Roblox Studio without spending your money. However, when you want to publish your game or audio, you have to pay some Robux. Once you are finished editing and testing your game, you may want to upload it to Roblox so other players can play it. Just go to File > Publish place to Roblox, then simply follow the steps to get it published. Or if your own game is already published, you can click "Publish to Roblox". For your information, you will need to pay some Robux depending on the size of your own game. How to install Roblox Studio on PC? For those who want to install Roblox Studio on PC, here are steps to do: At the first step, you have to go to Roblox Official website. After that, you are able to login into your account. Then, you have to visit any of your games and click on the three-dot icon in the upper-right corner and choose Edit. Afterwards, a pop-up window will open which will inform you that Roblox Studio is installing. Once installed, Roblox Studio will automatically open For Note: A secondary pop-up window will show asking you to choose a program. Just choose Roblox and confirm. If you choose to remember your choice, you will not need to perform this action in the future. Some information about Roblox Studio Recommended Ages Roblox Studio is perfect for people ages 10 and up who are new to coding or ready for their challenge after using block-based programs such as Scratch. It is approachable for all ages while still offering state of the art development tools for professional game developers. Coding in Roblox Studio Need to know that Roblox Studio uses a typed-out scripting language named Lua. It is best described as similar to Python, however even easier to teach because Lua does not need strict typing for semicolons and other syntax which make create hurdles for the new learners. Currently, Roblox Studio does not offer drag-and-drop coding, like found in Scratch. Hardware Requirements Roblox Studio is the crucial building tool for Roblox games. To run it, you will need: A PC or Mac computer. Roblox Studio will not be able to run on Chromebooks or mobile devices such as smartphones. Internet access. This will allow you to keep Roblox Studio up to date and also gives option for you to save your own projects to your account. A Roblox account. Roblox Studio is free to use and does not need a license. A 2-button mouse with a scroll wheel is highly recommended. Disabling Roblox Player Roblox Studio and Roblox Player are two separate pieces of software. While Roblox Studio is used to make and develop, Roblox Player is used to play the games of Roblox. To use Roblox Studio, Roblox Player does not actually have to be installed.
